EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Bilinski on April 27, 2006.

The application has been amended as follows:

In the claims:

Claim 1. A biosensor comprising a development layer where an inspection target solution is developed, and holding at least a marker reagent part where a marker reagent is held so as to be dissolved by the development of the inspection target solution in a part of the development layer, and a reagent immobilization part where a reagent which specifically reacts to an analysis target in the inspection target solution is immobilized in a part that is chromatographically downstream relative to the marker reagent part of the development layer[, wherein];

the development layer is provided with a bleaching reagent area where a bleaching reagent having bleaching action [for fading colored components in a liquid sample] is supported in a dry state where it can be dissolved, at least in a part of a sample application area where the inspection target solution is applied or downstream

of the sample application area in the permeating direction of the inspection target solution;

wherein, the bleaching reagent is sodium percarbonate.

Claim 3. The biosensor as defined in claim 1, wherein the bleaching reagent [having bleaching action for fading colored components in a liquid sample] is directly carried on the development layer so as to be dissolved.

Claim 6. Canceled.

Reason(s) for Allowance

2. The following is an examiner's statement of reasons for allowance: the instant claims define over the prior art of record because the prior art of record fail to teach or make obvious a chromatographic biosensor having a sample application area, a labeled reagent area, a detection area and further comprises the bleaching reagent, sodium percarbonate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
